

# Filip Berkowski promoted to Executive Partner at MCI Capital

13.04.2026

Filip has been responsible for some of MCI's most important investments in recent years, in particular IAI (e-commerce software). During MCI's investment period, the company significantly scaled its operations and strengthened its market position across Central and Eastern Europe, culminating in a successful exit.

At the same time, Filip remains actively involved in the development of key portfolio companies, including Netrisk and Profitroom, where MCI continues to support further business scaling and international expansion. He is also actively sourcing new investment opportunities in SaaS and B2B software, leveraging his experience in scaling companies and building regional and European technology leaders.

"Filip has been one of the key pillars of MCI's investment platform. In recent years, he has played an important role in delivering some of our most significant projects - including the successful development of companies such as IAI, Netrisk and Profitroom. His ability to scale businesses and consistently build value makes him a natural choice for the role of Executive Partner," - said Paweł Borys, Managing Partner at MCI Capital.

Before joining MCI, Filip served as Vice President at Enterprise Investors, where he gained investment experience across a range of sectors, including IT, telecommunications, data centers, financial services, retail and consumer goods. He began his career in transaction advisory at EY. Filip is a graduate of the Warsaw School of Economics.
