– The decision on the earlier repayment of bonds is related to obtaining additional significant funds by the Fund, due to the finalization of the transaction related to the sale of a part of shares in Netrisk, the Hungarian insurer leader, with a value of EUR 77.1 million. We use surplus liquidity to reduce the balance of our total debt, but most

of all to reconstruct the financing from medium-term (12-24 months) to long-term (over 24 months) – adjusted to our investment cycle – said **Ewa Ogryczak, Member of the Management Board of MCI Capital TFI S.A.**

– We are currently in the repayment phase of financing that matures within 18 months and are focusing our efforts on obtaining long-term debt financing. We are talking to both domestic and foreign financial institutions – added **Ewa Ogryczak.**
