

MCI Management SA publishes results for 2009

10.03.2010

The MCI Management SA Capital Group generated the consolidated annual net profit of PLN 44.4 million (that is 106% better than in 2008), while the value of consolidated assets at the end of the year increased to 333.7 million PLN. MCI sustains the high rate of return on its investments in this part of the economic turmoil in the last several months.

The total average net rate of return on investments realized by MCI, in the period from the beginning of its activities to the end of 2009, computed as the sum of full and partial exits, amounted to 19.89% a year, while for the whole portfolio (additionally including book valuations as on December 31 2009 less management costs) it was 19.56% a year. During 2009, these indicators grew by over two percentage points in comparison to the end of 2008, thus confirming the position of MCI among the top private equity funds in Europe.

In 2009, MCI recorded a significant increase in value of consolidated assets compared to the year 2008. The value of consolidated net assets (NAV) of MCI after four quarters of 2009 reached 266.0 million PLN, growth of 29% to the equivalent period of last year (PLN 206.2 million). The value of assets under management (AUM) at the end of 2009 amounted to 418.4 million PLN (including the full investment commitment of managed funds and fulfillment of investment commitments from 2009).

“Results these good are the effect of successful realization of the most important priorities of the group last year, which contributed to the dynamic growth of value of assets held by MCI. This growth was caused by an improvement in the economic situation and the results of our portfolio companies. Currently, the portfolio of MCI represents a significant economic value: the accumulated turnover of companies managed by our teams exceeds three billion PLN and the total EBITDA comes close to 100 million PLN. It is also noteworthy that in spite of the difficult economic situation MCI portfolio companies have earned profits, primarily allotted to pay dividends.” said, Tomasz Czechowicz, President of MCI management SA.

MCI is trying to develop newer and newer areas of operation. In 2009, two new investment funds managed by MCI began their operations, Helix Ventures Partners FIZ and MCI Gandalf Aktywnej Alokacji SFIO. Also of extreme importance was the commencement of the pioneer project of distributing investment certificates of the MCI.TechVentures 1.0 subfund to external individual investors. The issuing of three-year bonds convertible to shares of MCI, worth 50 million PLN, thanks to which MCI gained a new group of significant financial investors.

An economic downturn never favors exiting from an investment. Despite that, in 2009, MCI executed exit transactions worth 26.2 million PLN. These included, among others, the full exits from some of MCI’s oldest investments, Bankier.pl and S4E (this transaction was ultimately finalized in 2010), and a partial exit from company One-2-One.

The year 2010 creates significant chances for MCI, which the company intends to take advantage of in order to continue its dynamic growth. The main ones are: the limited activities of competitors connected with their needs to restructure their portfolios and difficulties concerning raising new funds; attractive valuations on the market of new investments, the improving situation on the disinvestments market as well as increased interest from international investors in the Polish market in connection with the two macroeconomic results compared to other countries in Europe and around the world.

“Our main priority will be new investments – we are counting on being able to finalize at least five new investments worth in total over 50 million PLN. We would like to emphasize subsequent buyout transactions in the areas of business process outsourcing, distribution/e-commerce and information technology as well as transactions connected with financing growth and expansion in mobile Internet, digital

entertainment and cloud-computing. Our plans for 2010 also include a series of exit transactions. We are planning to introduce at least two IPOs. In addition to the IPO of ABC Data, we are also considering offerings from such companies as Invia, Telecom Media and Genomed. Of course we will keep you informed about all these transactions.

â added Czechowicz.
