

MCI's plans in Puls Biznesu

29.09.2023

MCI Capital assumes that in 2023-25 it will add approximately 10 new companies to its portfolio and will allocate PLN 1.5-2 billion for acquisitions.

„There are more and more attractive investment proposals on the market, but it was not good. Until the beginning of the second quarter, mainly businesses that had no choice due to debt or performance problems were up for sale. It's much better now because valuations have improved a bit, but there aren't that many investors with money. We have PLN 1 billion at hand and we will have the second one thanks to investment exits in the coming years. We can complete 3-4 transactions per year. We will grow successively. I assume that in 2030 our new investments will exceed PLN 5 billion in total, which will make us the leader of the private equity market in the region – says Tomasz Czechowicz Czechowicz in an interview with Marcel Zatoński from Puls Biznesu.
