11.09.2009

The non-public issue of bonds convertible to shares of MCI Management SA has been completed successfully. Due to high demand, surpassing supply, orders had to be reduced.

The issue was indented mainly for institutional investors. Three-year bonds convertible to shares were offered. The size of the issue was 5000 pcs, worth a total PLN 50M. "We are very happy with the results of the issuing, especially so, that the bondholders who received the bonds included several funds (investment and open pension funds). The great interest in our bonds is also proof of what demanding financial investors are seeking today. The convertible bond is a hybrid; encompassing the features of a debenture, yielding fixed interest, and due to the option to convert to shares the features of a security. I hope that having converted to shares the present bondholders will become future shareholders of MCI. We shall make every effort in order for them to find the returns on this investment highly satisfying." " said Beata Stelmach, Member of the Board of MCI Management SA.

Selected parameters of the bonds:
